

End of Module Report Submission (Draft, Feedback)

Hi Michael

It is a good topic and you highlighted the contents you wish to include to the article. I think you may emphasise on a distinctive technology strategy where people, purpose and technology are aligned together. You also can briefly outline the research and evaluation approaches for the application of the concept to a particular domain. I think you may avoid general overview, like, defining AI and ML, etc.

Overall, a good approach and I am happy with the direction.
